

Research-Creation Project

Option 2: Glitching tools – AI data poisoning

Group #: _____

Student 1: _____ Student 2: _____

Student 3: _____ Student 4: _____

Instructions

As a group, assign a score for each of the following categories. Use the criteria from the project rubric justifying your decisions.

	☐ Excellent	☐ Good – Adequate	☐ Some effort	☐ Insufficient
Critical Engagement in individual report	Insightful and well-written. Strong connection to chosen theme (e.g., cyborg theory, BIPOC futurism) and thoughtful integration into the creative work.	Solid understanding of the theme. Clear effort to connect research to project, with some originality.	Basic understanding of the theme. Limited analysis or unclear connection to the creative outcome.	Vague, incomplete, or disconnected from course themes. May lack citations or clarity.
Why did you give yourself this score? (3–4 lines)				
What is one thing you feel was missing or unclear in your written analyses that you would improve if you had more time?				

	☐ Excellent	☐ Good – Adequate	☐ Some effort	☐ Insufficient
Final Assembled Project	Visually compelling and conceptually cohesive. Presentation format enhances the project's impact and reflects collective artistic direction.	Strong visual cohesion and logical sequence. Some moments of strong alignment between concept and visuals.	Adequate presentation. Concept or aesthetic may be underdeveloped or uneven across the group.	Disjointed or confusing presentation. Lacks a unified visual or conceptual thread.
Why did you give yourself this score? (3–4 lines)				
What is one improvement you would make to your group's final assemblage (e.g., layout, sequencing, text, or cohesion) to strengthen the visual and conceptual impact?				

	☐ Excellent	☐ Good – Adequate	☐ Some effort	☐ Insufficient
Images and AI Poisoning Workflow Integration	Each image clearly reflects the group's visual logic and follows the full workflow (CoPilot → Nightshade → Wombo). Results are unexpected and aesthetically rich.	Most images follow the intended workflow with some creative variation. Visual consistency is mostly preserved.	Some images do not clearly reflect the workflow or show inconsistent quality.	Workflow is incomplete, unclear, or disconnected from project goals.
Why did you give yourself this score? (3–4 lines)				
What is one part of your workflow (prompting, poisoning, or remixing) that could be improved or refined to achieve stronger visual or conceptual results?
